IPCC TFI Side Event

Wetlands & Software:
IPCC TFI Developments

8th June 2011, Bonn
Side Event today:

- 2013 Supplement to 2006 Inventory Guidelines: Wetlands
  - SBSTA Invitations and IPCC responses
  - Chapter Outline
  - A User’s Perspective
- Software for 2006 GLs
- EFDB
IPCC’s Response to SBSTA Invitations:
Preparation of 2013 Supplement to the 2006 IPCC Inventory Guidelines: Wetlands

Taka Hiraishi,
Co-chair, IPCC Task Force on National Greenhouse Gas Inventories (TFI)
SBSTA 32 Invitation and IPCC Expert Meeting

• The SBSTA 32, as part of its consideration of the use of the 2006 IPCC Guidelines, invited the IPCC “to organize an expert meeting to explore the need and ways to clarify methodological issues related to reporting on HWP, wetlands and Soil N$_2$O.

• In response to this, an IPCC Expert meeting on HWP, Soil N$_2$O and Wetlands was held in October 2010, which considered the need for additional guidance on them in order to fill gaps in the 2006 Inventory Guidelines.
IPCC Expert Meeting concluded: (1)

- The meeting ... in general considered that the methodological advice contained in the 2006 IPCC Guidelines still reflects the latest science... Since the 2006 IPCC Guidelines were completed much new scientific information is now available about various wetlands that enable emissions and removals to be estimated from wetland restoration and rewetting especially for peatlands. The meeting recommended that the IPCC provide additional methodological guidelines for the rewetting and restoration of peatland; emissions from fires, ditches and waterborne carbon; and constructed wetlands for waste water disposal, to fill gaps in the existing guidelines.”
The meeting also noted the availability of new information across climate zones for wetlands and drainage addressed in other land use chapters and recommended developing country and region specific EFs from this information.
SBSTA 33 Conclusions (Cancun, 2010)

• “The SBSTA took note of the summary of the co-chairs of the IPCC expert meeting on harvested wood products, wetlands and \( \text{N}_2\text{O} \) emissions from soils. Noting that science has developed in some areas with regard to wetlands, the SBSTA invited the IPCC to undertake further methodological work on wetlands, focusing on the rewetting and restoration of peatland, with a view to filling in the gaps in the 2006 IPCC Guidelines for National Greenhouse Gas Inventories ... in these areas and to complete this work for the thirty-ninth session of the SBSTA.” (i.e., in 2013)
IPCC Scoping meeting & Plenary Decision
to produce 2013 Supplement

• In response to this SBSTA invitation, and utilising the contingency funds in the 2011 budget, the “IPCC Expert Meeting on Scoping Additional Guidance on Wetlands” was held at the WMO in Geneva, Switzerland from 30th March to 1st April, 2011.

• This meeting produced a draft Terms of Reference (ToR), including annotated chapter outline.

• The IPCC at its 33rd Session in Abu Dhabi (10th -13th May 2011) decided to produce the “2013 Supplement to the 2006 IPCC Guidelines for National Greenhouse Gas Inventories: Wetlands”.
Work has started!

- On 1\textsuperscript{st} June, IPCC issued its formal letter of invitation of author nominations to its member Governments and international organizations – the deadline is 30\textsuperscript{th} June.
- In accordance with the current IPCC Principles and Procedures, there will be four authors meetings and two IPCC Reviews before the final Government consideration.
- This work will abide by the IPCC Principles and Procedures, including those new rules that may be adopted by the IPCC Plenary in the course of the 2013 Supplement. The guidance to authors will be kept updated on the IPCC NGGIP webpage http://www.ipcc-nggip.iges.or.jp/home/wetlands.html
