

LUCF SECTOR GOOD PRACTICE GUIDANCE

AUTHORS AND REVIEW EDITORS

Co-ordinating Lead Authors

Gert-Jan Nabuurs (The Netherlands), N.H. Ravindranath (India), and Keith Paustian (USA)
Annette Freibauer (Germany), William Hohenstein (USA), and Willy Makundi (Tanzania)

Lead Authors

Harald Aalde (Norway), Abdelazim Yassin Abdelgadir (Sudan), Anwar Sheikhdin Abdu Khalil (Bahrain), James Barton (New Zealand), Kathryn Bickel (USA), Samsudin Bin-Musa (Malaysia), Dominique Blain (Canada), Rizaldi Boer (Indonesia), Kenneth Byrne (Ireland), Carlos Cerri (Brazil), Lorenzo Ciccarese (Italy), David-Cruz Choque (Bolivia), Eric Duchemin (Canada), Lucien Dja (Ivory Coast), Justin Ford-Robertson (New Zealand), Wojciech Galinski (Poland), Jean-Claude Germon (France), Hector Ginzo (Argentina), Michael Gytarsky (Russian Federation), Linda Heath (USA), Denis Loustau (France), Tijani Mandouri (Morocco), Josef Mindas (Slovakia), Kim Pingoud (Finland), John Raison (Australia), Vladimir Savchenko (Belarus), Dieter Schöne (UN-FAO), Risto Sievanen (Finland), Kenneth Skog (USA), Keith Smith (UK), and Deying Xu (China)

Contributing Authors

Mark Bakker (France), Martial Bernoux (France/Brazil), Jagtar Bhatti (Canada), Rich Conant (USA), Mark Harmon (USA), Yasuhiko Hirakawa (Japan), Toshiro Iehara (Japan), Moriyoshi Ishizuka (Japan), Esteban Jobbagy (Argentina), Jukka Laine (Finland), Marna van der Merwe (South Africa), Indu K. Murthy (India), David Nowak (USA), Steve Ogle (USA), P. Sudha (India), Bob Scholes (South Africa), and Xiaoquan Zhang (China)

Review Editors

Sergio Gonzalez-Martineaux (Chile), Anke Herold (Germany), and Audun Rosland (Norway)

Contents

3.1	INTRODUCTION	3.11
3.1.1	Inventory and Reporting Steps.....	3.11
3.1.2	Linkage between this Chapter and the <i>IPCC Guidelines</i> ' Reporting Categories.....	3.11
3.1.2.1	Changes in forest and other woody biomass stocks.....	3.13
3.1.2.2	Forest and grassland conversion.....	3.13
3.1.2.3	Abandonment of croplands, pastures, or other managed lands.....	3.13
3.1.2.4	CO ₂ emissions and removals from soils.....	3.14
3.1.2.5	Other categories of reporting and specific cases.....	3.14
3.1.3	Definitions of Carbon Pools.....	3.14
3.1.4	General Methods.....	3.15
3.1.5	Tier Levels.....	3.16
3.1.6	Choice of Method.....	3.17
3.1.7	Reporting.....	3.20
3.1.8	Generic Climatic Zones.....	3.20
3.2	FOREST LAND	3.23
3.2.1	Forest Land Remaining Forest Land.....	3.23
3.2.1.1	Change in carbon stocks in living biomass.....	3.24
3.2.1.2	Change in carbon stocks in dead organic matter.....	3.32
3.2.1.3	Change in carbon stocks in soils.....	3.38
3.2.1.4	Non-CO ₂ greenhouse gas emissions.....	3.45
3.2.2	Land Converted to Forest Land.....	3.50
3.2.2.1	Change in carbon stocks in living biomass.....	3.51
3.2.2.2	Change in carbon stocks in dead organic matter.....	3.56
3.2.2.3	Change in carbon stocks in soils.....	3.60
3.2.2.4	Non-CO ₂ greenhouse gas emissions.....	3.65
3.2.3	Completeness.....	3.66
3.2.4	Developing a Consistent Time Series.....	3.66
3.2.5	Reporting and Documentation.....	3.66
3.2.6	Inventory Quality Assurance/Quality Control (QA/QC).....	3.68
3.3	CROPLAND	3.69
3.3.1	Cropland Remaining Cropland.....	3.69
3.3.1.1	Change in carbon stocks in living biomass.....	3.70
3.3.1.2	Change in carbon stocks in soils.....	3.74
3.3.1.3	Non-CO ₂ greenhouse gas emissions.....	3.82
3.3.2	Land Converted to Cropland.....	3.83

3.3.2.1	Change in carbon stocks living biomass.....	3.84
3.3.2.2	Change in carbon stocks in soils.....	3.89
3.3.2.3	Non-CO ₂ greenhouse gas emissions.....	3.93
3.3.3	Completeness.....	3.95
3.3.4	Developing a Consistent Time Series.....	3.95
3.3.5	Reporting and Documentation.....	3.96
3.3.6	Inventory Quality Assurance/Quality Control (QA/QC).....	3.96
3.3.7	Estimation of Revised GPG Tier 1 Defaults for Mineral Soil C Emissions/Removals for Cropland.....	3.97
3.4	GRASSLAND	3.105
3.4.1	Grassland Remaining Grassland.....	3.105
3.4.1.1	Change in carbon stocks in living biomass.....	3.106
3.4.1.2	Change in carbon stocks in soils.....	3.111
3.4.1.3	Non-CO ₂ greenhouse gas emissions.....	3.120
3.4.2	Land Converted to Grassland.....	3.120
3.4.2.1	Change in carbon stocks in biomass.....	3.121
3.4.2.2	Change in carbon stocks in soils.....	3.126
3.4.2.3	Non-CO ₂ greenhouse gases.....	3.130
3.4.3	Completeness.....	3.130
3.4.4	Developing a Consistent Time Series.....	3.131
3.4.5	Reporting and Documentation.....	3.131
3.4.6	Inventory Quality Assurance/Quality Control (QA/QC).....	3.131
3.4.7	Estimation of Revised GPG Tier 1 Defaults for Grassland Management.....	3.132
3.5	WETLANDS	3.135
3.5.1	Wetlands Remaining Wetlands.....	3.135
3.5.2	Land Converted to Wetlands.....	3.135
3.5.2.1	Change in carbon stocks in land converted to peat extraction.....	3.136
3.5.2.2	Change in carbon stocks in land converted to flooded land (Reservoirs).....	3.140
3.5.3	Completeness.....	3.140
3.5.4	Developing a Consistent Time Series.....	3.140
3.5.5	Reporting and Documentation.....	3.141
3.5.6	Inventory Quality Assurance/Quality Control (QA/QC).....	3.141
3.6	SETTLEMENTS	3.143
3.6.1	Settlements Remaining Settlements.....	3.143
3.6.2	Land Converted to Settlements.....	3.143
3.7	OTHER LAND	3.145
3.7.1	Other Land Remaining Other Land.....	3.145
3.7.2	Land Converted to Other Land.....	3.145
3.7.2.1	Change in carbon stocks in living biomass.....	3.145
3.7.2.2	Change in carbon stocks in soils.....	3.147

3.7.3	Completeness	3.149
3.7.4	Developing a Consistent Time Series	3.149
3.7.5	Reporting and Documentation	3.149
3.7.6	Inventory Quality Assurance/Quality Control (QA/QC).....	3.149
Annex 3A.1	Biomass Default Tables for Section 3.2 Forest Land	3.151
Annex 3A.2	Reporting Tables and Worksheets	3.187
Appendix 3a.1	Harvested Wood Products: Basis for Future Methodological Development	3.257
Appendix 3a.2	Non-CO₂ Emissions from Drainage and Rewetting of Forest Soils: Basis For Future Methodological Development	3.273
Appendix 3a.3	Wetlands Remaining Wetlands: Basis for Future Methodological Development	3.277
Appendix 3a.4	Settlements: Basis for Future Methodological Development	3.295

Equations

Equation 3.1.1	Annual carbon stock change in a given pool as a function of gains and losses	3.16
Equation 3.1.2	Annual carbon stock change in a given pool.....	3.16
Equation 3.2.1	Annual emissions or removals from forest land remaining forest land.....	3.23
Equation 3.2.2	Annual change in carbon stocks in living biomass in forest land remaining forest land (Default Method).....	3.24
Equation 3.2.3	Annual change in carbon stocks in living biomass in forest land remaining forest land (Stock Change Method)	3.24
Equation 3.2.4	Annual increase in carbon stocks due to biomass increment in forest land remaining forest land.....	3.25
Equation 3.2.5	Average annual increment in biomass	3.26
Equation 3.2.6	Annual decrease in carbon stocks due to biomass loss in forest land remaining forest land	3.26
Equation 3.2.7	Annual carbon loss due to commercial fellings	3.27
Equation 3.2.8	Annual carbon loss due to fuelwood gathering	3.27
Equation 3.2.9	Annual other losses of carbon.....	3.28
Equation 3.2.10	Annual change in carbon stocks in dead organic matter in forest land remaining forest land	3.32
Equation 3.2.11	Annual change in carbon stocks in dead wood in forest land remaining forest land (Option 1).....	3.33
Equation 3.2.12	Annual change in carbon stocks in dead wood in forest land remaining forest land (Option 2).....	3.34
Equation 3.2.13	Annual change in carbon stocks in litter in forest land remaining forest land	3.35
Equation 3.2.14	Annual change in carbon stocks in mineral soils in forest land remaining forest land	3.40
Equation 3.2.15	CO ₂ emissions from drained organic forest soils	3.42
Equation 3.2.16	Soil organic carbon content.....	3.43
Equation 3.2.17	Direct N ₂ O emissions from managed forests	3.46
Equation 3.2.18	Direct N ₂ O emissions from forest fertilisation.....	3.46
Equation 3.2.19	Estimation of non-CO ₂ emissions from C released.....	3.49
Equation 3.2.20	Estimation of GHGs directly released in fires	3.49
Equation 3.2.21	Annual change in carbon stocks in land converted to forest land	3.51
Equation 3.2.22	Annual change in carbon stocks in living biomass in land converted to forest land (Tier 1)	3.51
Equation 3.2.23	Annual increase in carbon stocks in living biomass in land converted to forest land	3.52
Equation 3.2.24	Annual decrease in carbon stocks in living biomass due to losses in land converted to forest land.....	3.52
Equation 3.2.25	Annual change in carbon stocks in living biomass in land converted to forest land (Tier 2)	3.53
Equation 3.2.26	Change in carbon stocks in living biomass in land annually converted to forest land	3.53

Equation 3.2.27	Annual change in carbon stocks in dead wood in land converted to forest land.....	3.57
Equation 3.2.28	Annual change in carbon stocks in dead wood in land converted to forest land.....	3.57
Equation 3.2.29	Annual change in carbon stocks in litter in land converted to forest land.....	3.58
Equation 3.2.30	Annual change in carbon stocks in litter in land converted to forest land.....	3.58
Equation 3.2.31	Annual change in carbon stocks in mineral soils in land converted to forest land.....	3.62
Equation 3.2.32	Annual change in carbon stocks in mineral soils upon afforestation ¹	3.63
Equation 3.2.33	CO ₂ emissions from drained organic soils in land converted to forest land.....	3.63
Equation 3.3.1	Annual change in carbon stocks in cropland remaining cropland.....	3.70
Equation 3.3.2	Annual change in carbon stocks in soils in cropland remaining cropland	3.74
Equation 3.3.3	Annual change in carbon stocks in mineral soils for a single cropland system	3.75
Equation 3.3.4	Annual change in carbon stocks in mineral soils in cropland remaining cropland	3.78
Equation 3.3.5	CO ₂ emissions from cultivated organic soils in cropland remaining cropland	3.79
Equation 3.3.6	Annual carbon emissions from agricultural lime application	3.80
Equation 3.3.7	Total change in carbon stocks in land converted to cropland	3.83
Equation 3.3.8	Annual change in carbon stocks in living biomass in land converted to cropland.....	3.85
Equation 3.3.9	Change in carbon stocks as a result of clearing biomass in a land use conversion	3.86
Equation 3.3.10	Carbon losses from biomass burning, on-site and off-site	3.86
Equation 3.3.11	Carbon losses from biomass decay	3.87
Equation 3.3.12	Annual change in carbon stocks in soils in land converted to cropland.....	3.89
Equation 3.3.13	Total annual emissions of N ₂ O from mineral soils in land converted to cropland.....	3.93
Equation 3.3.14	N ₂ O emissions as a result of the disturbance associated with land-use conversion of forest, grassland, or other land to cropland	3.94
Equation 3.3.15	Annual nitrogen released by net soil organic mineralisation as a result of the disturbance (based on soil C mineralised)	3.94
Equation 3.4.1	Annual change in carbon stocks in grassland remaining grassland	3.105
Equation 3.4.2	Annual change in carbon stocks in living biomass in grassland remaining grassland	3.106
Equation 3.4.3	Annual change in carbon stocks in living biomass in grassland remaining grassland	3.107
Equation 3.4.4	Annual change in living biomass – Rate Approach	3.107
Equation 3.4.5	Annual change in living biomass – Difference Approach	3.108
Equation 3.4.6	Total biomass	3.108
Equation 3.4.7	Annual change in carbon stocks in soils in grassland remaining grassland	3.111
Equation 3.4.8	Annual change in carbon stocks in mineral soils for a single grassland system	3.112
Equation 3.4.9	Annual change in carbon stocks in mineral soils in total grassland remaining grassland	3.113
Equation 3.4.10	CO ₂ emissions from cultivated organic soils in grassland remaining grassland	3.114
Equation 3.4.11	Annual carbon emissions from agricultural lime application	3.115
Equation 3.4.12	Total change in carbon stocks in land converted to grassland	3.120
Equation 3.4.13	Annual change in carbon stocks in living biomass in land converted to grassland..	3.122
Equation 3.4.14	Change in carbon stocks as a result of biomass clearing during land use conversion.....	3.123
Equation 3.4.15	Carbon losses from biomass burning, on-site and off-site	3.123

Equation 3.4.16	Carbon losses from biomass decay	3.124
Equation 3.4.17	Annual change in carbon stocks in soils in land converted to grassland (LG).....	3.126
Equation 3.5.1	Change in carbon stocks in land converted to wetlands.....	3.136
Equation 3.5.2	Annual change in carbon stocks in land converted to peat extraction.....	3.136
Equation 3.5.3	Annual change in carbon stocks in living biomass in land converted to peat extraction.....	3.137
Equation 3.5.4	Annual change in carbon stocks in soils in land converted to peat extraction	3.137
Equation 3.5.5	Annual change in carbon stocks in soils due to drainage of organic soils converted to peat extraction	3.138
Equation 3.5.6	Annual change in carbon stocks in living biomass in land converted to flooded land	3.140
Equation 3.6.1	Annual change in carbon stocks in living biomass in forest land converted to settlements (FS)	3.143
Equation 3.7.1	Annual change in carbon stocks in land converted to “Other Land”	3.145
Equation 3.7.2	Annual change in carbon stocks in living biomass in land converted to “Other Land”	3.146
Equation 3.7.3	Annual change in carbon stocks in mineral soils in land converted to “Other Land”	3.148

Figures

Figure 3.1.1	Decision Tree for Identification of Appropriate Tier-Level for Land Remaining in the same Land Use Category (Example given for Forest Land Remaining Forest Land, FF)	3.18
Figure 3.1.2	Decision Tree for Identification of Appropriate Tier-Level for Land Converted to another Land Use Category (Example given for Land Converted to Forest Land, LF)	3.19
Figure 3.2.1	Two temporally averaged values of soil organic carbon corresponding to different combinations of forest soils, management practices and disturbance regimes.....	3.39

Tables

Table 3.1.1	Mapping between the sections of Chapter 5 of the 1996 IPCC Guidelines and the sections of Chapter 3 of this report.....	3.12
Table 3.1.2	Definitions for terrestrial pools used in Chapter 3.....	3.15
Table 3.1.3	Sub-categories within a given land use section.....	3.20
Table 3.2.1	Updated defaults for litter carbon stocks and transition period.....	3.36
Table 3.2.2	Updated defaults of natural mortality rates, dead wood stocks, and live:dead ratios.....	3.37
Table 3.2.3	Default values for CO ₂ -C emission factor for drained organic soils in managed forests.....	3.42
Table 3.2.4	Default reference (under native vegetation) soil organic C stocks (SOC _{Ref}).....	3.43
Table 3.2.5	Sources of uncertainty in estimating CO ₂ emission/removal from forest soil and DOM pools.....	3.61
Table 3.3.1	Tier descriptions for subcategories under cropland remaining cropland.....	3.70
Table 3.3.2	Default coefficients for aboveground woody biomass and harvest cycles in cropping systems containing perennial species.....	3.71
Table 3.3.3	Default reference (under native vegetation) soil organic C stocks (SOC _{Ref}).....	3.76
