

6 March 2017

IPCC Inventory Software Version 2.18 released on 6 March 2017

Release note

This version of the IPCC Inventory Software fixed bugs and errors identified since the Version 2.17- Revision 1 released on 25 November 2016 (see the table below).

Sector	Location in Software	Details of bugs and errors
Waste	Worksheet: 4B	Default values for CH ₄ and N ₂ O emission factors in 9 th Corrigenda were not reflected.
Waste	Worksheet: 4B	Data entered in dry/wet weight bases for CH ₄ and N ₂ O emissions could not be deleted completely.
Waste	Worksheet: 4C1	Dropdown list for CH ₄ emission factor: the value for continuous incineration/stoker was different from the value in Table 5.3, Volume 5 of the 2006 IPCC Guidelines.
Waste	Worksheet: 4C2	Total amount of waste open-burned was not transferred correctly in CH ₄ and N ₂ O worksheets.
Key category analysis	Tools	For categories where sinks occur, the absolute values were not being calculated correctly.
