

20 July 2017

IPCC Inventory Software Version 2.54 released on 6 July 2017

Release note

This version of the IPCC Inventory Software implements Tier 2 methods for Energy, IPPU and Waste sectors. Also it fixed bugs and errors identified since the Version 2.18 released on 6 March 2017 (see the table below). For the details on for which categories Tier 2 method has been implemented, please refer to the table (Tier2_coverage.xlsx) available from http://www.ipcc-nggip.iges.or.jp/software/files/Tier2_coverage.xlsx.

Sector	Location in Software	Details of bugs and errors
IPPU	NAI Reporting Tables	Precursors: double counting for categories that contain multiple worksheets
General	NAI Reporting Tables	Precursors: mapping the values from 2006 IPCC category 4.A to category 6A in NAI Reporting Table was not working correctly
AFOLU	3.D.1	Minus value was incorrectly shown under category 3.D.1 in Summary report due to an error in internal cache of 3.D.1 data.
