

Task Force on National Greenhouse Gas Inventories

Key Questions to Guide Discussion

Side Event during UNFCCC SB40

5 June 2014, Bonn, Germany

INTERGOVERNMENTAL PANEL ON climate change

Let's discuss future

- We would like you to consider a few key questions about the future evolution of the IPCC TFI products.
- The discussion at this side event will become useful input to the **IPCC Expert Meeting on Systematic Assessment of TFI Products** on 25-27 August this year.

Key Questions

- How should the IPCC TFI products evolve in future in coverage/scope/format in response to emerging UNFCCC needs?
- How could IPCC TFI products maintain consistency and comparability with GHG reporting for other purposes within the UNFCCC process?
- What, if any, potential future changes within the UNFCCC process could have implications for the IPCC GHG inventory guidance?
- What other products could enhance the usefulness of IPCC GHG inventory guidance and keep it up-to-date?
