

<Review Comments by governments on Glossary in Second Order Draft of KP Supplement>

ID	Government	Chapter/Section	Start Line	End Line	Comment	Supplementary documents	Authors' action	Authors' note
GL_G_001	Germany	Glossary	7720	7883	Please add the following definitions: managed forest (especially its relationship to planted forest), natural forest, timberline, organic soil and its relation to wetlands, predominant land use.		Reject. The definition of "managed forest", "natural forest" and "organic soil" are already included in GL2006 glossary. More guidance on "organic soils" is included in the 2013 Wetnads supplement. The "predominant land" use is not included in the current text anymore, so there is no need to define. "Timberline" is mentioned only in one example (box 2.3.2) and as such does not require a specific definition.	
GL_G_002	Germany	Glossary	7833	7835	Does this mean that planted forest is the broader term than forest plantation? What is the difference? Please include this information in the definition.		Reject. A definition of planted forest is included in the Glossary. Since it "include forest plantations as defined in the 2006 IPCC Guidelines.", it may be broader, depending on country's definition (see section 1.2)	
GL_G_003	New Zealand	glossary	7718	7718	Be helpful to have a definition of "conversion" and "clear fell" as these terms are also used in the guidance. The definitions should cover what each means in terms of calculating stock changes and the distinction between forest remaining forest and when land use change is confirmed		Reject. The definition of "managed forest", "natural forest" and "organic soil" are already included in GL2006 glossary. More guidance on "organic soils" is included in the 2013 Wetnads supplement. The "predominant land" use is not included in the current
