

ANNEX 2A.1

REPORTING TABLES¹ FOR KP LULUCF ACTIVITIES UNDER THE KYOTO PROTOCOL

¹ The Reporting Tables are for the compilation of relevant information only and differ from the Common Reporting Format (CRF) tables that are designed by SBSTA. Moreover, not all cells provided in the tables need to be filled.

TABLE 2A.1 TABLE OF CONTENTS		
Table	Content	Notes
Summary Table		
Table 1A	Summary table of emissions and removals from activities under Article 3.3, Forest Management and elected activities under Article 3.4	This table is intended to demonstrate completeness in carbon pools and GHG reporting and to report the total net GHG emissions in the inventory year from each mandatory and elected activity.
Table 1B	Selected parameters for defining "Forest" under the Kyoto Protocol (additional information)	
Land Transition Matrix		
Table 2A	Land Transition Matrix with areas and changes in areas between the previous and the current inventory year	The value of the reported area subject to the various activities under Articles 3.3 and 3.4 for the inventory year should be that on 31 December of that year.
		Total area reported in this table should match the total area of the country.
Table 2B	Area of natural forests converted to planted forests (additional information)	This table should be used to report land areas of natural forests converted to planted forests since the start of the commitment period, if any. Associated emissions and removals are implicitly reported under Forest Management.
Key Category Analysis		
Table 3	Summary of <i>key categories</i> for Land Use, Land-Use Change and Forestry activities under the Kyoto Protocol	List all KP-LULUCF <i>key categories</i> and describe for each category why and how it has been identified as key.
Article 3.3: Afforestation and Reforestation		
Table 4A	Article 3.3 activities: Carbon stock changes under Afforestation and Reforestation	Report in this table carbon stock changes in all lands, encompassed by each geographical location, that are subject to Afforestation and Reforestation under Article 3.3.
		All lands reported under Afforestation and Reforestation would otherwise be subject to Forest Management.
Table 4B	Background level of emissions associated with natural disturbances in AR lands and its margin, where a margin is needed (additional information)	Report information in this table only if the Party elected to exclude emissions in forest associated with natural disturbances that are beyond the control of, and not materially influenced by, the Party.
Table 4C	Emissions associated with natural disturbances (additional information)	Report information in this table only if the Party elected to exclude emissions associated with natural disturbances, in AR lands, that are beyond the control of, and not materially influenced by, the Party.
		Information reported in this table is additional to that reported in table 4A and 10, and therefore does not replace the need to report in those tables all carbon stock changes and all non-CO ₂ GHG emissions associated with natural disturbances in AR lands.
		Report in this table information on changes in carbon stocks and non-CO ₂ GHG emissions for the inventory year for all geographical locations that encompass lands subject to Afforestation and Reforestation under Article 3.3 where natural disturbances have occurred.

Table 4D	Removals subsequent to natural disturbances (additional information)	Report information in this table only if the Party elected to exclude emissions associated with natural disturbances, in AR lands, that are beyond the control of, and not materially influenced by, the Party.
		Information reported in this table is additional to that reported in Table 4A, and therefore does not replace the need to report all carbon stock changes in AR lands in that table.
		Report here all removals in the inventory year, for all geographical locations that encompass lands subject to Afforestation and Reforestation where natural disturbances have occurred in any year of the commitment period and whose emissions were excluded from accounting. Where Parties do not exclude natural disturbance emissions from specific lands they should provide information on how they have determined the subsequent removals to be excluded
Article 3.3: Deforestation		
Table 5A	Article 3.3 activities: Carbon stock changes under Deforestation	Report in this table carbon stock changes in all lands, encompassed by each geographical location, that are subject to Deforestation under Article 3.3.
		Lands that have been deforested and subsequently reforested need to be reported as a subcategory of deforested land in order to transparently report emissions and removals on these lands which, despite being reported under D, match the forest definition.
Table 5B	Deforested land previously subject to natural disturbances (additional information)	Report information in this table only if the Party elected to exclude emissions in forest associated with natural disturbances that are beyond the control of, and not materially influenced by, the Party.
		Information reported in this table is additional to that reported in Tables 5A and 10, and therefore does not replace the need to report in those tables all carbon stock changes and non-CO ₂ GHG emissions associated with natural disturbances.
		Report in this table information on land that has been deforested after having been subject to natural disturbances in a year of the commitment period.
Article 3.4: Forest Management		
Table 6A	Article 3.4 activities: Carbon stock changes under Forest Management	Report in this table carbon stock changes in all lands, encompassed by each geographical location, that are subject to Forest Management under Article 3.4.
Table 6B	Forest Management reference level (additional information)	Report here the numerical values of the FMRL (with HWP pool and without), and any further Technical Correction, and information on the methodological approach applied to calculate it.
Table 6C	Carbon Equivalent Forests (CEF) (additional information)	Information reported in this table is additional to that reported in Table 6A, and therefore does not replace the need to report in that table all carbon stock changes associated with clearing and establishing of forests reported as Carbon Equivalent Forests under Forest Management. This table is aimed at checking whether the equivalent forest that has been planted is achieving the expected carbon stock.
		Report in this table information on carbon stock that was in the harvested and converted forest plantation (CEF-hc), at time of harvesting, and of current carbon stock in the equivalent forested area (CEF-ne), for all lands subject to the CEFC provisions, within Forest Management under Article 3.4 (see paragraphs 37-39

		of Annex to Decision 2/CMP.7) for which the "carbon equivalence" has not been achieved yet. This means that lands should be reported here until the year, and including the year, in which the carbon equivalence is achieved.
Table 6D	Background level of emissions associated with natural disturbances in FM lands and its margin, where a margin is needed (additional information)	Report information in this table only if the Party elected to exclude emissions associated with natural disturbances, in FM lands, that are beyond the control of, and not materially influenced by, the Party.
Table 6E	Emissions associated with natural disturbances (additional information)	Report information in this table only if the Party elected to exclude emissions associated with natural disturbances, in FM lands, that are beyond the control of, and not materially influenced by, the Party.
		Information reported in this table is additional to that reported in Tables 6A and 10, and therefore does not replace the need to report all carbon stock changes and non-CO ₂ GHG emissions associated with natural disturbances in those tables.
		Report in this table information on changes in carbon stocks and non-CO ₂ GHG emissions for the inventory year for all geographical locations that encompass lands subject to Forest Management under Article 3.4 where natural disturbances have occurred.
Table 6F	Removals subsequent to natural disturbances (additional information)	Report information in this table only if the Party elected to exclude emissions associated with natural disturbances, in FM lands, that are beyond the control of, and not materially influenced by, the Party.
		Information reported in this table is additional to that reported in Table 6A, and therefore does not replace the need to report all carbon stock changes in FM lands in that table.
		Report in this table all incremental removals in the inventory year, for all geographical locations that encompass lands subject to Forest Management where natural disturbances have occurred in any previous year of the commitment period whose emissions were excluded from accounting. Incremental removals are those additional to the removals from the lands that have been embedded in the FMRL construction. Where Parties do not exclude natural disturbance emissions from specific lands they should provide information on how they have determined the subsequent removals to be excluded.
Article 3.4: Cropland Management – Grazing Land Management – Revegetation – Wetland Drainage and Rewetting		
Table 7	Carbon stock changes under elected Article 3.4 activities	Report in this table carbon stock changes in all lands, encompassed by each geographical location, that are subject to the elected activities under Article 3.4.
		For each elected activity, this table and all relevant tables should also be reported for the base year.
Non-CO₂ GHG emissions		
Table 8A	Direct and Indirect N ₂ O emissions from N inputs to managed soils	Report in this table direct and indirect N ₂ O emissions from N fertilization in all lands, encompassed by each geographical location, which are subject to activities under Article 3.3 and 3.4, and whose emissions have not been reported in the Agriculture Sector.

		N ₂ O emissions from N inputs to areas, subject to Article 3.3 or 3.4, which are activities included under Cropland and Grassland in the Convention reporting should be reported in the Agriculture Sector. If a Party is not able to separate fertilizer applied to different land-use categories, it may report all N ₂ O emissions from fertilization in the Agriculture Sector and this table should not be filled.
Table 8B	N ₂ O emissions from mineralised N resulting from loss of soil organic C stocks in mineral soils through land-use change or management practices	Report in this table N ₂ O emissions from mineralised N resulting from loss of soil organic C stocks in mineral soils through land-use change or management practices in all lands, encompassed by each geographical location, which are subject to activities under Article 3.3 and 3.4, and whose emissions have not been reported in the Agriculture Sector.
		N ₂ O emissions from mineralised N resulting from loss of soil organic C stocks in mineral soils through land-use change or management practices in areas, subject to Article 3.3 or 3.4 activities, which are included under Cropland and Grassland in the Convention reporting should be reported in the Agriculture Sector.
Table 9A	CH ₄ and N ₂ O emissions from Drainage of organic soils	Report in this table CH ₄ and N ₂ O emissions from Drainage of organic soils in all lands, encompassed by each geographical location, which are subject to activities under Article 3.3 and 3.4, and whose emissions have not been reported in the Agriculture Sector.
		CH ₄ and N ₂ O emissions from drainage of organic soils in areas, subject to Article 3.3 and 3.4 activities, which are included under Cropland and Grassland in the Convention reporting should be reported in the Agriculture Sector.
Table 9B	CH ₄ and N ₂ O emissions from Rewetting of organic soils	Report in this table CH ₄ and N ₂ O emissions from Rewetting of organic soils in all lands, encompassed by each geographical location, which are subject to activities under Article 3.3 and 3.4, and whose emissions have not been reported in the Agriculture Sector.
		CH ₄ and N ₂ O emissions from rewetting of organic soils, in areas subject to Article 3.3 and 3.4 activities, which are included under Cropland and Grassland in the Convention reporting should be reported in the Agriculture Sector.
Table 10	GHG emissions from burning of organic matter	Report in this table GHG emissions from burning of organic matter in all lands, encompassed by each geographical location, which are subject to activities under Article 3.3 and 3.4, and whose emissions have not been reported in the Agriculture Sector.
		CO ₂ emissions from burning of organic matter that are reported as C stock changes in the relevant activity table (i.e. Tables 4A, 5A, 6A, and 7) should not be reported here.
		Non-CO ₂ emissions associated with burning of living biomass and DOM of savannas and of agricultural residues should be reported in the Agriculture Sector.
Harvested Wood Products		
Table 11A	Carbon stock changes in the Harvested Wood Products pool	

Table 11B	Harvested Wood Products activity data	HWP originated in the first commitment period from lands subject to AR activities should not be reported here.
		When FM was elected in the first commitment period, HWP originated in the first commitment period from lands subject to FM activities should not be reported here.
		When for FM the Party chose not to include historical HWP in its reporting, HWP originated before 1 January 2013 from lands subject to FM activities should not be reported here.
<p>GENERAL NOTES:</p> <ol style="list-style-type: none"> 1. Geographical location refers to the boundaries of the areas that encompass lands subject to the activity (or subject to the particular provision). 2. Activity data may be further subdivided according to climate zone, management system, soil type, vegetation type, tree species, ecological zone, national land classification or other criteria. One row should be completed for each subdivision. 3. The value reported for net change in SOC of organic soils could be an emission and not a carbon stock change. 		

TABLE 1A SUMMARY TABLE														
Emissions and removals from activities under Article 3.3, Forest Management and elected activities under Article 3.4														
Inventory year:														
Activity		Changes in carbon pool and sources of greenhouse gases reported

			(kha)			(Gg C)						
TOTAL FOR ACTIVITY FM												
<i>FM lands never subject to the Natural Disturbances provision in a year of the commitment period (excluding CEFC land)</i>												
TOTAL												
<i>New forested land for CEFC (CEF-ne) never subject to the Natural Disturbances provision in a year of the commitment period</i>												
TOTAL												
<i>Harvested and converted land within CEFC (CEF-hc)</i>												
TOTAL												
<i>FM lands subject to the Natural Disturbances provision in a year of the commitment period (excluding CEFC land)</i>												
TOTAL												
<i>New forested land for CEFC (CEF-ne) subject to the Natural Disturbances provision in a year of the commitment period</i>												
TOTAL												

Table 6A (continued)								
Article 3.4 activities: Carbon stock changes under Forest Management								
Inventory year								
GEOGRAPHICAL LOCATION	CHANGE IN CARBON STOCK							Net CO ₂ (Gg CO ₂)
Identification code	Net carbon stock change in litter	Net carbon stock change in dead wood	Net carbon stock change in HWP ⁽²⁾	Net carbon stock change in soils				
				Mineral soils	Organic soils			
					Drained	Rewetted	Other	
(Gg C)								(Gg CO ₂)
TOTAL FOR ACTIVITY FM								
<i>FM lands never subject to the Natural Disturbances provision in a year of the commitment period (excluding CEFC land)</i>								
<i>New forested land for CEFC (CEF-ne)</i>								
TOTAL								
<i>Harvested and converted land within CEFC (CEF-hc) never subject to the Natural Disturbances provision in a year of the commitment period</i>								
TOTAL								
<i>FM lands subject to the Natural Disturbances provision in a year of the commitment period (excluding CEFC land)</i>								
TOTAL								
<i>New forested land for CEFC (CEF-ne) subject to the Natural Disturbances provision in a year of the commitment period</i>								
TOTAL								

(1) For lands reported as Carbon Equivalent Forest, report here the year in which the land has been either forested or harvested and converted. While for lands subject to natural disturbances for which associated emissions have been excluded from accounting, report here the year in which the natural disturbances occurred.

(2) Data to be reported in this table come from the "Net Change" column of table 11A. A single value for the total net change in the HWP at national level could be reported here. Further, if HWP reporting is based on instantaneous oxidation, report IO here.

TABLE 6B ADDITIONAL INFORMATION: FOREST MANAGEMENT REFERENCE LEVEL						
Inventory year						
Approach applied				Value inscribed in Appendix to Decision 2/CMP.7 ⁽¹⁾		Technical correction as calculated in the reporting year:
Approach	Inclusion of Natural Disturbance (Yes/No)	HWP		with instantaneous oxidation for HWP	with first order decay function for HWP	
		Methodology ⁽²⁾	Inclusion of the historical stock ⁽³⁾ (Yes/No)			
				Gg CO ₂ -eq yr ⁻¹		
<p>(1) The value inscribed in Appendix to Decision 2/CMP.7 is reported here in Gg CO₂-eq yr⁻¹</p> <p>(2) Instantaneous oxidation, First Order Decay function, Country-specific</p> <p>(3) This is reflected in cell "Initial stock" in Table 11A</p>

Living biomass (LB)				Dead Organic Matter (DOM)		Soil Organic Matter(SOM) ⁽³⁾					
Description ⁽²⁾				Value	Description ⁽²⁾	Value	Description ⁽²⁾	Value			
Area burned (kha) LB burned (kt dm)					Area burned (kha) DOM burned (kt dm)		Area burned (kha) SOM burned (kt dm)		(Gg)		
Total activity FM											
Total for controlled burning											
Total for wildfires											
Total elected activity ⁽⁵⁾											
Total for controlled burning											
Total for wildfires											

(1) Report the identification acronym of the elected activity (i.e. CM, GM, RV, or WDR).
(2) For each activity, activity data should be selected from either area burned (kha) or organic matter burned (kt dm).
(3) Report this pool only in case of peatland burning.
(4) If CO₂ emissions from biomass burning are not already included in the carbon-stock change table of the relevant activity, they should be reported here. This also includes the carbon component of CH₄.
(5) For each elected activity, complete a set of rows with lands subject to the activity and add rows with the totals (total wildfire, total prescribed burning, and total for the activity) of the elected activity

TABLE 11A
CARBON STOCK CHANGES IN THE HARVESTED WOOD PRODUCTS POOL

Inventory year										
ORIGIN OF WOOD		PRODUCT TYPE			PARAMETERS		CHANGE IN CARBON STOCK			Net CO ₂

From all remaining lands											

(1) Includes sawnwood, wood-based panels, paper and paperboard.
(2) Half-lives are needed when applying flux data method (i.e. Tier 2 method)
(3) Initial stock is the HWP stock of the specific product type at 1 January of the inventory year.
(4) Gains refer to annual carbon inflow to HWP pool, losses refer to annual carbon outflow from HWP pool.
(5) Subcategories refers to the HWP subcategories listed in Table 2.8.1.

TABLE 11B HARVESTED WOOD PRODUCTS ACTIVITY DATA ⁽¹⁾									
Inventory year									
Year	HWP category ⁽²⁾								
	Reported unit ⁽³⁾								
	C conversion factor ⁽⁴⁾								
	Production	Import	Export	Production	Import	Export	Production	Import	Export

(1) The information in Table 11B should be compiled based on mass weighted averages (see Table 2.8.1 of Section 2.8)

(2) Includes sawnwood, wood-based panels, paper and paperboard. In cases where country-specific subcategories are used, it is good practice for countries to transparently document this in their inventory reports.

(3) e.g. m³ or t

(4) Applied to convert from HWP category units to carbon
