## Main Challenges

## National capacities & finance

## Increasing reporting requirements (BTRs)

Consistency NDC\_NGHGI\_ART6\_REDD+

## Consistent land representation & Definitions

## Consistency among data sources

## Disaggregating natural & anthropogenic

## Gain & Loss method application

SOC

## Main Assumptions

All land is considered as managed. Approach 2-3 Hybrid approach (attributed final land use)

Forests are in steady state. Gain-Loss Method: Forest growth estimates based on National Forest Inventory.

Degradation based on equivalent area estimation for wood extraction.

All forest fires are anthropogenic. Instant CO<sub>2</sub> Oxidation. Direct & indirect CH<sub>4</sub> and NO<sub>2</sub> emissions.
